Week 01 – [4th Apr 26 – 10th Apr 26]

Objectives Achieved

1. Introduction and liaise with team members
   - Created a telegram group for easy communication.
   - Short introduction by each team member to get to know one another better.
2. Met project supervisor
   - Got a brief overview of what to expect for the coming weeks.
   - Obtained instructions on how to proceed for the following week.
3. Chose group leader
   - Discussed the roles and responsibilities of the team leader.
   - Held a short discussion to decide who should take on the role.
4. Sent an email to project supervisor
   - Included information of all team members and identified team leader.
5. Received project plan from project supervisor
   - Read through the project plan carefully.
   - Gained a better understanding of the project requirements and expectations.
6. Created a branding kit for use across the website, app, slides, etc
   - Standardised UI/UX components for consistency.
7. Set up project website
   - Added email collection, about page, and meeting page to store and display meeting minutes.
8. Proceeded with individual research
   - Follow research guidelines in project plan and add additional information where necessary
   - Prepared 3min presentation in preparation for first meeting

Setbacks Faced

1. Initial uncertainty about project expectations
2. Need for alignment of communication style, responsibilities, expectations
3. Balancing setup work and research

Reflection

For the first week, we focused on getting to know each other, understanding project requirements, and preparing basic resources for the project. We created communication channels, selected a team leader, met with our supervisor, and reviewed the project plan. We also created a branding kit, set up the project website, and worked on our individual research. Although there was some uncertainty at the start about the project scope and expectations, this week helped us build a strong foundation for the work ahead.

Week 02 – [11th Apr 26 – 17th Apr 26]

Objectives Achieved

1. Discussion with teammates on website design
   - Went through each member's vision for branding style for the whole project.
   - Agreed on what branding style to use, Praveen will make some adjustments.
   - Discussed on the features that the website should have, and how they should work.
2. Discussion on overall project direction
   - Discussed about our thoughts on the overall direction that we want to take the project based on our initial individual research.
   - Gave each other feedback on how we can improve before our presentation during the first meeting with our supervisor.
3. Created project website
   - Used the branding kit to make things consistent.
   - Added relevant features.
4. First meeting with supervisor
   - Highlighted general things to take note.
   - Briefed on the project plan regarding we need to submit and by when.
   - Presented individual research and our supervisor's feedback on what we can improve on.
   - Supervisor went through what our next steps are and what are some key points that he wants us to take note of, with examples.

Setbacks Faced

1. Difficulty aligning everyone's design preferences
   - Everyone had different ideas on the branding style, website layout, etc, so it took a lot of discussion to agree on a design direction.
2. Building of website took more time than expected
3. Need to refine research after supervisor feedback

Reflection

This week was productive as we aligned on a common branding style, created the project website, and attended our first meeting with our supervisor. The meeting helped clarify project expectations, deliverables, and areas where our research could be improved. However, we faced some challenges, such as differing design preferences among team members, the website taking longer to build than expected, and the need to refine our research after receiving feedback. Overall, the week helped us establish a clearer direction for the project and highlighted the areas we need to work on next.
